AA Proposal

AA Proposal	**Date: 9/15/2008**	**Time:**
Subject: Co-Terminal Flying		**Version: 4**
Proposal Reference(s): APA Proposals – 10/24/2007, 6/10/2008, 8/27/2008; AA Proposals – 5/7/2008, 5/29/2008, 8/12/2008		
Contract Reference(s): Sections 2.G, 2.KK and 15.C.3.c.		

1. Add language to Section 2.G. to read: All sequences must originate and terminate at the same airport.

2. Add language in Section 2.KK. to read: Up to three (3) times per year per bid status (Base, Equipment, Division), or more often by mutual agreement, and coincident with a schedule change, lines may contain more than one sequence that originate from different airports. The maximum number of sequence origination airports in any line is two (2), with a single transition during the month. This does not relieve the requirement to start and end a sequence from the same airport.

3. Eliminate the last sentence in Section 6.E.: “This shall not apply between co-terminals served by the same pilot base.”

4. Eliminate 15.C.3.c.
